**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 2, 5-8 and 11-12 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Bernard, 5735732. Please refer to column 7, lines 43 through column 8, lines 12; and figure 8 and its description.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. Claims 13-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bernard, 5735732 in view of Whipple, 2426478. '732 does not disclose how debris is handled. '478, column 10, lines 32-53, teaches providing a collection tube, **88, 89** arranged to be inserted into at least one port and forming a seal with the port, and a vented and removable cap **90** attached to the end of the tube opposite the end to be inserted into the port. The tube is "adapted" (capable of) to be connected to a vacuum hose. The collector forms an elbow. It would have been obvious to one of ordinary skill in the art to have provided '732 with the debris collector taught by '478, to prevent debris from escaping the device and contaminating the area around the device.

***Allowable Subject Matter***

6. Claims 3, 4, 9 and 10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
